

The **Canadian High School program** is a result of a partnership between Atlantic Education International (AEI) – from New Brunswick, Canada – and Sociedade Inteligência e Coração (SIC) – the supporter of Colégio Santo Agostinho schools in Minas Gerais state, Brazil.

The program has been a success since its establishment in 2015, graduating more than 100 students so far, at Belo Horizonte and Nova Lima campuses, which are located close to each other. It is an international education program for Colégio Santo Agostinho students, endorsed by teachers who come from Canada or other English speaking countries.

The Canadian High School is a two-year international education program, focused on the first and second grades of Secondary School – years 10<sup>th</sup> and 11<sup>th</sup>. The great difference of the High School program is to give students the opportunity to study subjects of the Canadian curriculum that are not taught at Colégio Santo Agostinho, such as Entrepreneurship.

Surrounded by breathtaking mountains, Belo Horizonte is a global, modern and cozy city. It is the sixth largest city in Brazil – and one of the safest capitals – and due to its mild temperature, as well as an exciting cultural life, it has countless reasons for the expatriate to love it.

Nova Lima is inserted in the mountains of Minas Gerais and it is very close to the capital, Belo Horizonte. The city is nowadays a touristic, gastronomic and brewing center – it stands out in the national context for the production of handcrafted beer and it has the largest production in Minas Gerais State, which is in the third place of handcrafted beer manufacturer in Brazil. It is also a sports and cultural center - its mountains and trails invite visitors to go sightseeing and enjoy radical activities.

## COLÉGIO SANTO AGOSTINHO SCHOOL - GENERAL OVERVIEW AND PHILOSOPHY

Colégio Santo Agostinho is a K-12 Brazilian school, which enrolls over 8000 students in its 4 campuses, in the state of Minas Gerais, the second largest in population. It was founded in 1934 by Spanish Augustinian friars, guided by core values such as innovation, ethics, integrity and citizenship. Since then, it has been pursuing students' academic excellence and personal growth, encouraging them to act collegially in the learning process and to form relationships based on mutual respect, acting with autonomy, critical thinking, independence, social conscience, and honesty.

It is a very demanding school and therefore, students are continuously challenged, in a rigorous academic environment. As a result, they are prepared to achieve their personal and academic goals, in national and international projects and entrance examinations to universities in Brazil and abroad. The school has very high entrance rate to the top Brazilian universities among secondary schools in Minas Gerais and ranks among the top schools in the national exam ENEM - Exame Nacional do Ensino Médio (National Exam for High School students), administered once a year by the Ministry of Education, every November. Besides, in High School, our students are able to complement their Brazilian with the Canadian Curriculum, taking 12 extra subjects from the New Brunswick department of Education. They also participate in different extra-curricular activities such as: Model UN, interchange programs to Canada and Spain, volunteering activities, sports' competitions and robotics practices.
